

Cathodic protection system at Swanson Dock West, Port of Melbourne

Port of Melbourne Corporation (PoMC) is installing a cathodic protection system at the wharf at Swanson Dock West as part of wharf upgrade works.

Energy Safe Victoria has approved the system which has been designed in accordance with the Australian Standards (AS2832.3 - 2005).

Before commissioning the system on 31 March 2008, permanent signs will be erected on Swanson Dock West advising that special operating conditions apply.

Please note, Swanson Dock is a Security Regulated Zone under the Commonwealth *Maritime Transport and Offshore Facilities Security Act (MTOFSA) 2003*.

For more information, please contact PoMC's Community Information Line: Tel: 1300 857 662, option 4.
